Customer Reviews

This book, to start off, is the best book I have ever read. It has a very good plot, coming from the buildup of the previous books before it. It seems to be in the climax area of the whole plot altogether. What happens is the flock finally figures out all about the main villains, Itex. They Just escaped from one of their facilities when Max and Fang, the flock's most important two members, start getting arguments. Max thought that they had to save the world from Itex, while Fang wanted to just let the world end so there wouldn't be anything to worry about anymore. The arguments get so out of hand, that the flock splits into two! So Max, Nudge, Angel, Total, and even Ari start saving the world their own way, while Fang, The Gasman, and Iggy Go their own way to save the world. Both of their methods actually worked in the end, ironically. At the end there's your typical happy ending. I don't want to give away too much of what happens but that is the amazing plot of this amazing book. The second thing is that this book, like the series, doesn't follow along with the

natural nature of twists. You would think that there would be your normal period of confusion that sparks your interest in the book, then it would end before another confusing twist occurs, right? Wrong. In this book none of that happens. They will give you a beginning twist, but what they do is they add ANOTHER twist to EXTEND the period of confusion, messing with your brain until at the end of the section or even at the end of a chapter! Other books don't do that at all. They will just explain everything right away so that the rest of the story is quite predictable. In this book, you never know what's going on, only what direction things are going in.
