Fractal Art: A Coloring Book By Doug Harrington

Synopsis

Zoom in or zoom out, and you will find within a fractal the same simple but irregular shape replicate itself in complex patterns. While these often resemble structures in the world around usâ€”a nautilus shell, a snowflake, a spiderâ€™s webâ€”nature has its limits. But the fractals devised from mathematical formulas are infinite, both outwardly and inwardly. Fractal geometry creates a space where repetition is beauty, where math is art, and where perfection is possible. For nearly twenty years Seattle artist Doug Harrington has been making digital fractals that seem tie-dyed, faceted, or kaleidoscopic. He produces these diverse and vibrant images digitally and in fine art prints. Each piece, based on an original formula, is unique. These black-and-white versions of Harringtonâ€™s original fractals present a special opportunity to study their form. Find the repetition and reveal the pattern as you colorâ€”it may not be what it seems at first glance. And if you need assistance, the original artworks are printed on the inside of this coloring bookâ€™s covers. Includes 50 images of Doug Harringtonâ€™s original fractals
