Battletech, 25th Anniversary Introductory Box Set

Customer Reviews

I wanted to like this product, I really did. The books were glossy and awesome, the mounted hex maps were fabulous. All of the materials included were of the finest quality... EXCEPT for the most important part of all: the mechs. When I opened my new box, here is what I found. This is everything that was wrong with my miniatures: 1. The Cyclop's arm was broken off. 2. The Awesome's arm was glued on crooked, pressed against its body. 3. The Jenner's legs were all twisted backward, with the top not glued on right. 4. The Thor came pre-assembled, but the arm was glued on in the wrong direction. Part of the problem is not necessarily that the minis are too cheap. Most of them look decent, and some look really good. The problem is they are all crammed in a little plastic bag which is jammed tight into the box. They are already fragile. I don't see how you can pack them together in such a tight space and not expect a few pieces to get bent or broken. It's disappointing too, because everything else is such high quality. But how can I give it more than one star if I'm forced to return the item? Thank customer service for quick, easy returns. But I don't feel like re-buying another one of these at all. With such hit-and-miss quality, you are definitely taking your chances! Also, one thing I wondered as I surveyed the carnage of broken / mis-glued pieces, is why did they assemble these at all? It's such poor, obviously lousy quality. With extra glue slapped all over the pieces, and parts glued in the wrong place. I mean, if you're going to pre-assemble them for the customer AND do a shoddy job, why bother? Most of the people buying this are probably game hobbyists who plan to finish and paint them anyway.
