# Scientific Style And Format: The CSE Manual For Authors, Editors, And Publishers, Eighth Edition

## Synopsis

For more than fifty years, authors, editors, and publishers in the scientific community have turned to *Scientific Style and Format* for authoritative recommendations on all matters of writing style and citation. Developed by the Council of Science Editors (CSE), the leading professional association in science publishing, this indispensable guide encompasses all areas of the sciences. Now in its eighth edition, it has been fully revised to reflect today's best practices in scientific publishing. *Scientific Style and Format* citation style has been comprehensively reorganized, and its style recommendations have been updated to align with the advice of authoritative international bodies. Also new to the eighth edition are guidelines and examples for citing online images and information graphics, podcasts and webcasts, online videos, blogs, social networking sites, and e-books. Style instructions for physics, chemistry, genetics, biological sciences, and astronomy have been adjusted to reflect developments in each field. The coverage of numbers, units, mathematical expressions, and statistics has been revised and now includes more information on managing tables, figures, and indexes. Additionally, a full discussion of plagiarism and other aspects of academic integrity is incorporated, along with a complete treatment of developments in copyright law, including Creative Commons. For the first time in its history, *Scientific Style and Format* will be available simultaneously in print and online at [www.scientificstyleandformat.org](http://www.scientificstyleandformat.org). Online subscribers will receive access to full-text searches of the new edition and other online tools, as well as the popular Chicago Manual of Style Online Forum, a community discussion board for editors and authors. Whether online or in print, the eighth edition of *Scientific Style and Format* remains the essential resource for those writing, editing, and publishing in the scientific community.

## Book Information

Series: *Scientific Style and Format*

Hardcover: 840 pages

Publisher: University Of Chicago Press; 8 edition (May 7, 2014)

Language: English

ISBN-10: 0226116492

ISBN-13: 978-0226116495

Product Dimensions: 7 x 2 x 10 inches

Shipping Weight: 3.8 pounds (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars See all reviews (3 customer reviews)

Best Sellers Rank: #227,151 in Books (See Top 100 in Books) #131 in Books > Science & Math

> Reference #201 inÂ Books > Textbooks > Reference > Encyclopedias #272 inÂ Books > Reference > Words, Language & Grammar > Reference

## Customer Reviews

I am a professor at a small public liberal arts university and teach courses in a Biology department. We have a writing-across-the-curriculum program that involves intermediate and advanced levels of writing pertinent to the student's major. This book is the standard for style and formatting for most science journals and is published by the Council of Science Editors (CSE). As such, this book documents fully the standards for journal articles which are the models for laboratory reports in science courses for higher education. Our department uses two other books to introduce the CSE style to students (authored by J. Pechenik and K. Knisely), but for faculty, this is the REAL DEAL textbook for science authors. It comprehensively covers more than just in-text and end-material citations of literature, but also standards for abbreviations, SI units, graphics, statistical analysis, vocabulary, etc. with chapters covering special issues for subdisciplines within the sciences. Every professor teaching writing to science undergraduate or graduate students should have a desk copy of this manual and every college/university library should have a copy in its reference department. HIGHLY recommended! MLA and APA are the standards for other disciplines; CSE is for science.

Excellent book, probably the best I read about the topic...

Good
