Î In 930 text pages, Campbell Biology in Focus, Second Edition, emphasizes the essential content, concepts, and scientific skills needed for success in the college introductory course for biology majors. Î Focus.Î Practice.Î Engage.Î Campbell Biology in Focus is the best-selling short-textbook for the introductory college biology course for science majors. Every unit takes an approach to streamlining the material that best fits the needs of instructors, based on surveys, curriculum initiatives, reviews, discussions with hundreds of biology professors, careful analyses of course syllabi, and the report Vision and Change in Undergraduate Biology Education. The Second Edition builds on the Campbell hallmark standards of accuracy, clarity, and pedagogical innovation, going beyond this foundation to help students make connections visually across chapters, interpret real data from research, and synthesize their knowledge. The accompanying digital resources include new, mobile-friendly tools that help instructors teach challenging topics better than ever before; integrate the eText with videos and animations; and allow students to test, learn, and retest until they achieve mastery of the content. Î Also Available with MasteringBiology[®] This title is also available with MasteringBiology[®] an online homework, tutorial, and assessment product proven to improve results by helping students quickly master concepts. Students benefit from self-paced tutorials that feature personalized wrong-answer feedback and hints that emulate the office-hour experience and help keep students on track. With a wide range of interactive, engaging, and assignable activities, students are encouraged to actively learn and retain tough course concepts. New MasteringBiology activities for this edition include Interpret the Data Questions, which challenge students to analyze real data presented in a graph, figure or table, and Solve It Tutorials, which engage students in a multistep investigation of a scientific mystery. • For instructors, new Ready-to-Go Teaching Modules provide easy-to-use assignments for before and after class plus in-class activities with clicker questions and questions in Learning Catalytics[®].

Customer Reviews

I only got this because it was required for a college course. If your class requires this book Campbell Biology in Focus Plus MasteringBiology with eText -- Access Card Package (2nd Edition) then just get this a la Carte edition instead. It is the exact same book (other than it requires a binder since it is hole punched) and is about \$40 cheaper. My access code worked perfectly and the book and code came wrapped in plastic. Although you usually cant trade in a la Carte books online just sell it (or be nice and give it) to a fellow classmate that's going to take the class next semester and they can just buy the access code directly form the mastering biology website.

Do not buy this if you need a brand new with the access code! I paid for new and received an unsealed damaged book without access code. They replaced it with another and it came with the exact product! Not new no access code!! Just waist of time to send them back

I just ordered this book and it gets directly to the point. I personally like it instead of the other bulkier Campbell Biology book (your professor may or may not have you choose between the two). BTW the ACCESS CODE (if ordering new at least from) comes enclosed inside the BACK of the book.

I do not hate the book. I hate the fact that title does not mention that is the Volume two of the book and It is custom for specific college. This is misleading. I doubted and the first week of school passes I have to go try to refund it and go through the headache and buy another one and pay expedite.

Book did not come with access code for mastering biology

Did not come with an access code
