Customer Reviews

I recently purchased my algebra book online through and was quite surprised to receive it and find that it is an instructors edition. It was originally a \$245 book that I bought for \$165. The description said it had tape on the cover otherwise like new. This was true, the book has never been written in or damaged in any way. My teacher immediately knew it was an instructors edition because of the tape covering up large letters that say NOT FOR RESALE. I now am in class and do not have time to order books online and must go purchase another book for \$245. It is illegal to have an instructors edition and any administrator on campus may take it from me not to mention the ethical dilemma or the fact that I am paying good \$ for college and would like to actually learn the subject. Beware textbook buyers of "tape on the cover".

I've been a tutor for more than a decade. This is my favorite algebra book because it covers everything from basic to intermediate algebra, AND has LOTS of practice problems.

Don't even use it super stupid

good

Apparently this is the teachers version, so all the answers to the quizzes are on the same page as the quiz (makes it so much easier)...
