Teaching Archery To Kids

Synopsis

At last, an archery book about teaching archery to kids. Whether you're a new camp counselor that's never held a bow, a parent wanting to teach your child about a new and exciting activity, or a learning archer looking for a concise reference about the sport, this book is for you. It's filled with clear illustrations, fun examples, and step-by-step directions: part "how-to" guide, part desk reference.

Customer Reviews

As one who has taught archery to children for eight or nine years in various scenarios from summer camps to monthly meetings, to family members ranging in age from 6 yrs to adults, I had certain preconceptions about this book when it was given to me. The book was written in part for those who have never picked up a bow before. This book provides a pretty good basis for this, however, many things such as anchor point seem too "glossed over" for one unfamiliar with shooting form. More instruction or at least familiarity would be necessary for a novice to be competent to coach an archery program. I did enjoy how the book placed more focus on teaching than adult self instruction as is the focus of most of the literature. I must say that there were a few things in the book that I had never read or thought of before. Even an old dog can pick up a thing or two now and then. One sometimes gets bogged down into one method after a while, and it takes something to shake it up a bit to open the eyes again. This book can do that. The information is not new, nor is it groundbreaking, but it is put into a concise, fairly clear form, and is written in a manner that is pleasing to read. The book would not stand completely on it's own, but anyone teaching an archery program, no matter how long they have been in the game, would benefit from reading this book.

The book was very thorough. Covering sample lessons, range design, type of bow, and projects for the young student. A great book for someone who has just been handed the task of teaching archery to kids in a camp or other summer time situation.

This is the best book I have ever read for teaching kids archery...or for teaching anyone archery. I'm an archer now, at long last, and happy to be so. This book is so great for teaching kids, the best, no contest. Also: check out the youtube "Making a really loud whistling arrow" and there's another that shows how to use a kinder surprise to make a whistler. I haven't tried either one yet, but they seem promising. Thank you, Jim "Fletch" Fanjoy, you've written a timeless classic.
